Press Release

ERCO has joined LightingEurope

The German based fixture manufacturer ERCO has become a member of LightingEurope. ERCO specializes in architectural lighting with LED technology and operates with own sales organisations and partners in 55 countries. In 2015, the company was the first traditional luminaire manufacturer globally that has changed its product range completely to LED technology.

” ERCO develops, designs and produces digital luminaires with focus on photometrics, electronics and design”, explains Mark Oliver Schreiter, Managing Director of ERCO. “The future prospects as a result of ERCO pioneering the market in optoelectronics are gigantic. Accordingly, we have a strong interest in the dialogue between industrial actors and European policy experts as represented by LightingEurope.”

“LightingEurope is proud to be joined by a technology pioneer such as ERCO,” says Ourania Georgoutsakou, Secretary General of LightingEurope. “As a family-run, middle-sized company, ERCO is indicative of the wide range of companies that LightingEurope represents. With their strong technical expertise and their presence in many European countries, ERCO will make a valuable contribution to LightingEurope’s work to shape a positive EU policy framework for the lighting industry in Europe.”

About Lighting Europe

LightingEurope is an industry association of 34 European lighting manufacturers, national associations, and companies producing materials. LightingEurope members represent over 1,000 European companies, a majority of which are SMEs; a total workforce of over 100,000 people in Europe; and an annual turnover estimated to exceed 20 billion Euros. LightingEurope is dedicated to promoting efficient lighting practices for the benefit of the global environment, human comfort, and the health and safety of consumers. More information about LightingEurope is available on our website www.lightingeurope.org.
