Mapping of legislation which impacts the industry

Energy Labelling | Intro

What is it?:

- Review of Regulation 874/2012 on energy labelling for lighting products (delegated act)

Where are we now?:

- Energy labelling framework Regulation entered into force 1 August 2017
- New framework Reg.: scales A-G
- During entry-into-force: A+B to remain empty, aiming at 10 years validity of labels
- Commission and VHK are preparing revision proposal of **Delegated act on labelling of lighting products**

Energy Performance of Buildings (EPBD) | Intro

What is it?:

Review of Directive 2010/31/EU

Where are we now?:

This file follows ordinary legislative procedure where Council and Parliament need to agree on a common text.

- Commission's proposal was adopted in November 2016
- EU Council General Agreement was agreed in June 2017, setting up Council position on the file
- ITRE Committee of the European Parliament just adopted 11th of October its amendments to Commission's text

Energy Performance of Buildings (EPBD)

Opportunities:

EPBD Commission's review

- imposes on Member States to set system requirements for all technical building systems, built-in lighting included
- is encouraging the use of ICT and smart technologies introducing a Smartness Reading Indicator

Messages:

1. lighting systems as new technical building system (replacing current “built-in lighting”),
2. inclusion of built-in lighting and lighting systems in the calculation of energy performance of buildings
3. Member States Renovation Strategy to include also comfort and health aspects
4. Introduction of Smartness Indicator possibly taking health issues into account
